HOW-TO

DIY GUIDE #0105

MAKE YOUR CAR LAST FOR THE LONG RIDE

GET THE TIPS

CAR

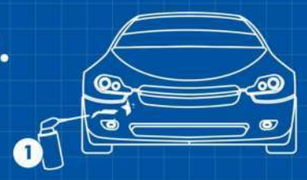

INSTRUCTIONS

1.

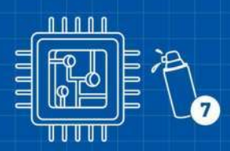

For daily cleaning and protection for your car's interior and exterior clean, spray WD-40® Smart Straw® on fragile spots on the car, scuff marks, or nuts and bolts, of the tyres.

2.

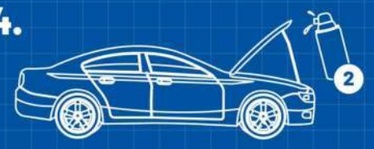

You can also use the WD-40® Smart Straw®, for removing old and new bumper stickers, just keep spraying while you peel the sticker off. And give the surface a good wipe to remove any sticky residue.

3.

Protect and clean electronic and electrical parts of the car with WD-40 Specialist® Fast Drying Contact Cleaner. Just spray it on and it dries out without the need to wipe away residue or dismantle any parts.

4.

Greasy under the hood? Take WD-40 Specialist® Degreaser and spray on the car hood, engine parts or windscreen, let sit for few minutes and wipe away the residue.

5.

Remove brake fluids, dirt and grease from brake linings, pads and drums without dismantling with the help of WD-40 Specialist® Brake & Parts Cleaner.

6.

Give your engine a deep clean by spraying WD-40 Specialist® Machine & Engine Degreaser on the engine. Make sure engine is off and is cooled down. Leave it for 5 mins and rinse with water.

7.

To maximize your carburetor and improve fuel system performance, grab the WD-40 Specialist® Throttle Body, Carb & Choke Cleaner, spray the exterior of the carburetor and down the down the carburetor throat or throttle body.

8.

To extend belt life, keeping it flexible and eliminate squeaks, spray WD-40 Specialist® Belt Dressing lightly on the inner surface of the belt while the engine is running. Avoid spraying the pulley directly.
